

Automatic asset numbering schema

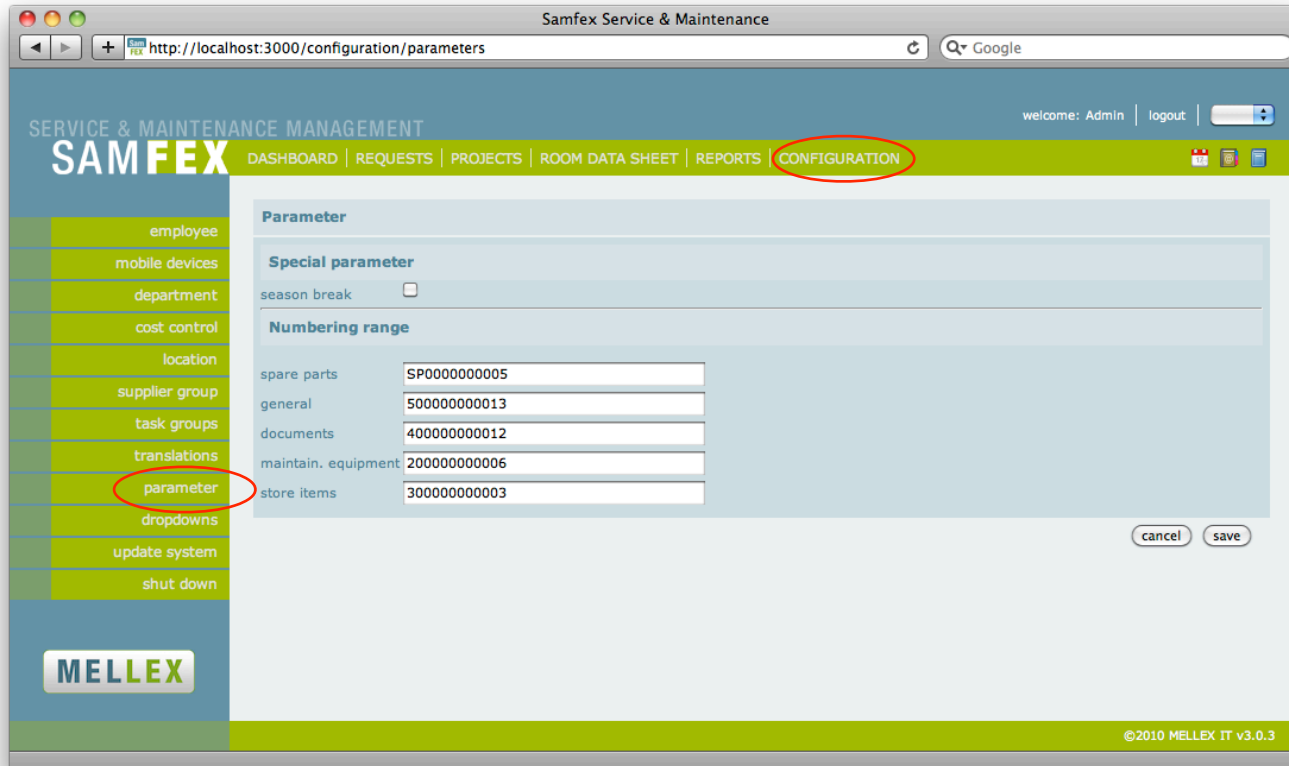

Click the new **NEW** icon to initiate the automatic numbering schema for assets. Samfex will state `<AUTOGENERATE>` in the matchcode field.

During the save process Samfex will generate a new number and assign the number to the new asset.

- ✓ numbers will be generated by successor. E.g. 001, 002, 003 or aaa, aab, aac
- ✓ number ranges can be specified in the configuration

Automatic asset numbering schema

Adjust the numbering range to your needs and click **save**

- ✓ maximum length for numbers is 45 characters
